

Tracking Shipments via GPS

Smart Tracking for High Value Shipments

HealthRFID GPS tracking solutions provides real-time tracking and monitoring of high-value and temperature-sensitive shipments. The solution allows you to monitor the chain of custody, location and condition of their shipment in amazing detail and accuracy!

How Your Organisation Can Benefit

This tracking technology was developed to meet the needs of organ and blood banks where life-saving cargo has a very short shelf life.

When shipping units of blood, tissue samples or even a kidney, the HealthRFID GPS tracking solution helps ensure your cargo arrives when it counts every time.

Features & Benefits

- Tracking available on all platforms
- Alerts for deliveries that are outside of designated areas
- Alerts for light, temperature, humidity, rotation/tilt and vibration/tampering
- Airline certified – FAA 14 CFR 121.36
